Lifting table
model ARDD
Double deck loading

Armo (UK)

Tel: 01952 606133

email: armouk@armoweb.com

A lifting table designed and manufactured to cater for double deck trailers.

- Full design package for double deck trailers fully compliant with **BS EN 1570**.
- Inclusive of handrails, gates and barriers.
- Fully hydraulic bridging plate.
- Designed for existing as well as new build.
- Free-standing load house option available.

Double deck lifting table

model ARDD

Features

One of the major developments in road haulage recently has been the increasing use of double deck vehicles. They are used extensively as a means of utilising the full volume of the trailer as well as its full carrying capacity. However, the use of these high vehicles on existing distribution buildings can be problematic. Armo has the solution, the ARDD lifting table is designed specifically to deal with the lifting height requirement and with its large platform it enables fast, efficient and safe loading of a double deck vehicle.

The model ARDD can be manufactured to suit double deck vehicles with both fixed upper decks or indeed moveable upper decks. The lift platform can be supplied up to 7500mm long as standard, enabling complete off loading of a deck in one cycle.

Armo lifting tables are simple and robust in design and construction, from the rolled steel angle base frame through to the solid steel plate arms right through to the structured platform, the lift is constructed to last.

Safety features

Safety with lifting tables is paramount and Armo lifts are fully compliant with **BS EN 1570** incorporating all the safety features you would expect:

- Peripheral safe edge with reset feature
- Chainmesh guards under exposed sides
- Designed handrails, barriers and interlocked gates
- Rupture valves in the unlikely event of hose burst
- Easily accessible maintenance prop
- Remote / on-board emergency stop
- Low voltage dead-man controls

Armo have been manufacturing high quality loading bay and lifting table solutions since 1972, for further technical or pricing information please contact our head office:
