

Goods Lift Tables

Model ARGL

A static scissor lifting table designed and manufactured to move goods from one level to another up to a height of 2500mm

Features

Model ARGL goods lift tables are available in a vast range of sizes, lift strokes, and lift capacities up to 20,000kg.

They are designed, manufactured and installed to comply with BS EN 1570 and are CE marked.

Robust in design and construction, from the rolled steel angle base frame through to the solid steel scissor arms, the lift is constructed to last.

Scissor arms pivot on maintenance-free techno-polymer IGUS bushes. The lower arms move up and down the solid base frame on steel wheels with bearings.

The goods lift table has a Bosch Rexroth powerpack, Allen Bradley electrical components and Schneider controls, along with low voltage safety interlocked controls and a remote emergency stop.

Platform lowering speed is set at <math>< 15\text{mm}</math> per second. The lifting speed is determined by the size of the powerpack motor.

The platform has a perimeter safety edge with a reset feature, lift cylinders with safety check valves and non-removeable maintenance props, lifting eyes, and mechanical stops.

The lift is designed for up 140 cycles every 24 hours. Its standard paint finish is suitable for dry environments.

Goods Lift Tables

Model ARGL

Options

- Upgrade lift design to 500 cycles per 24 hours.
- For damp or wet environments, the lift can be manufactured with a cold galvanised or hot-dipped galvanised finish, with stainless steel scissor arm pivot wheels.
- Inboard powerpack with an inspection hatch or outboard powerpack protected by a steel enclosure.
- Pit ingress protection can be provided by chain mesh, PVC roller blinds, or PVC lift bellows that totally enclose the lift base frame.
- Hydraulic or mechanical wheel stop.
- Lift controls can be upgraded to include safety indicator lights.
- A full range of safety interlocking available.
- Fully-sheeted or open design 1100mm high lift and dock mounted guarding
- Fully-sheeted or open design lift and dock mounted 1100mm interlocked gates with electro-mechanical lock.
- Onboard pedestrian walkway to separate loaded goods from personnel.
- Pit-mounted or floor-mounted with access an ramp.

Other options available on request

This is a standard ARMO product. We can also design and manufacture bespoke equipment that meets your specific needs.

Armo has been manufacturing high quality loading bay and lifting table solutions since 1972. For further technical or pricing information, please contact our head office:
