ARBD Wheel Alignment Guides

Description

The guides are manufactured with soft radius bends and are supplied for installing centrally to the loading bay, circa 2000mm from the dock face. The reversing vehicle slots between the guides ensuring that the vehicle docks safely and centrally onto the loading bay.

ARBD wheel alignment guides include base plates complete with 16mm diameter holes for anchoring down to a suitable concrete base.

Guides can be supplied in either 140mm or 170mm tube diameter with optional hot dipped galvanised or powder coated finish.

As standard guides can either be supplied 2000mm long or 3000mm long complete with front flared entry section.

ARCI Wheel Alignment Guides

Description

This model is a cast in version in lieu of bolt down, the tubular legs are supplied to cast-in 500mm below ground.

ARCI guides are available with the same features and options as the ARBD wheel alignment guides.

ARCI wheel alignment guides are normally provided on a supply only basis for casting in position by a contractor on a new build project.

ARDB Loading Dock Buffers

Description

A comprehensive range of industry standard buffers manufactured from heavy duty solid rubber, normally fixed to a primed and painted solid steel backing plate using M24 fixings, the plate in turn is bolted back to the dock face and additionally welded to the leveller frame to provide a long lasting solid fixing.

For ultimate durability alternative energy absorbing yellow polyethylene low friction dock buffers are also available in a range of sizes.

The front surface of the buffer is smooth, and the hardened polyethylene buffer is backed with a rubber shock absorbing fillet.

ARDL Dock Loading Light

Description

Articulate light mounted on a moveable arm, dust and waterproof with the whole system being easily and economically mounted just inside the loading bay door providing light into every corner of a docked trailer.

Optionally interlocked to the loading bay door so that the light automatically illuminates when the door is open and switches off when the door is closed.

ARTR LED Traffic Light

Description

Red over green LED traffic light, provided in a fully sealed unit complete with sun visors.

Nominally 140mm wide x 268mm long x 50mm deep with 24 diodes per light.

Traditionally interlocked to the loading bay door so that the light shows green when the door is closed and red whenever the door is open.
