email: [armouk@armoweb.com](mailto:armouk@armoweb.com)

A lifting table designed and manufactured to cater for both trailers and vans.

- Inclusive of handrails, gates and barriers.
- Fully hydraulic bridging plate.
- Designed for existing as well as new build.
- Freestanding load house option available.
- Full design package option for double deck trailers fully compliant with **BS EN 1570**.

# Vehicle loading lifting table

model ARVL

## Features

The use of a scissor lift as a 'vehicle loading' tool has many benefits. It can act as dock leveller to load standard vehicles and with the appropriate bridging plate it can be used to load small vans. The ARVL lifting table can even transport goods from the dock down to yard level.

Armo lifting tables are simple and robust in design and construction, from the rolled steel angle base frame through to the solid steel plate arms right through to the structured platform, the lift is constructed to last.

The pressure on retail to increase sales floor space at the cost of reducing stock-holding areas has increased the frequency of delivery vehicles to our shops and edge of town supermarkets. Some of these vehicles come directly from the supplier making life even more difficult for staff to offload and move into cramped buffer stock areas before the next delivery arrives.

Where it is not possible to have a raised dock, an Armo ARVL scissor lift can increase the speed and safety of unloading vehicles and allow more time for stock organisation.

Many of the UK's household names on the high street look to Armo to provide solutions to their vehicle loading problems.

## Safety features

Safety with lifting tables is paramount and Armo lifts are fully compliant with BS EN 1570 incorporating all the safety features you would expect:

- Peripheral safe edge with reset feature
- Chainmesh guards under exposed sides
- Designed handrails, barriers and interlocked gates
- Rupture valves in the unlikely event of hose burst
- Easily accessible maintenance prop
- Remote / on-board emergency stop
- Low voltage dead-man controls

Armo have been manufacturing high quality loading bay and lifting table solutions since 1972, for further technical or pricing information please contact our head office:
